

Name: Lane Dorscher

Date: 09/08/2025

Here are screenshots from the virtual desktop showcasing my program open in IDLE IDE.

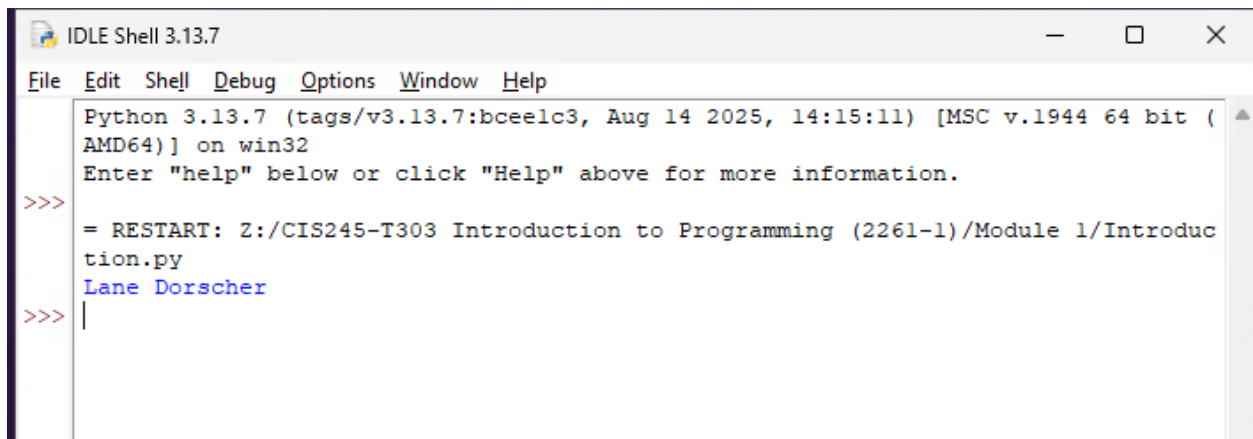

This is my file which is saved to my desktop.

The screenshot shows the IDLE IDE editor window. The title bar reads 'Introduction.py - Z:/CIS245-T303 Introduction to Programming (2261-1)/Module 1/Introductio...'. The menu bar includes 'File', 'Edit', 'Format', 'Run', 'Options', 'Window', and 'Help'. The code editor contains the following Python code:

```
1
2 firstName = "Lane"
3 lastName = "Dorscher"
4 fullName = firstName + " " + lastName
5
6 print(fullName)
7
```

Here is the IDLE shell which has ran my simple introduction program successfully showcasing simple string concatenation

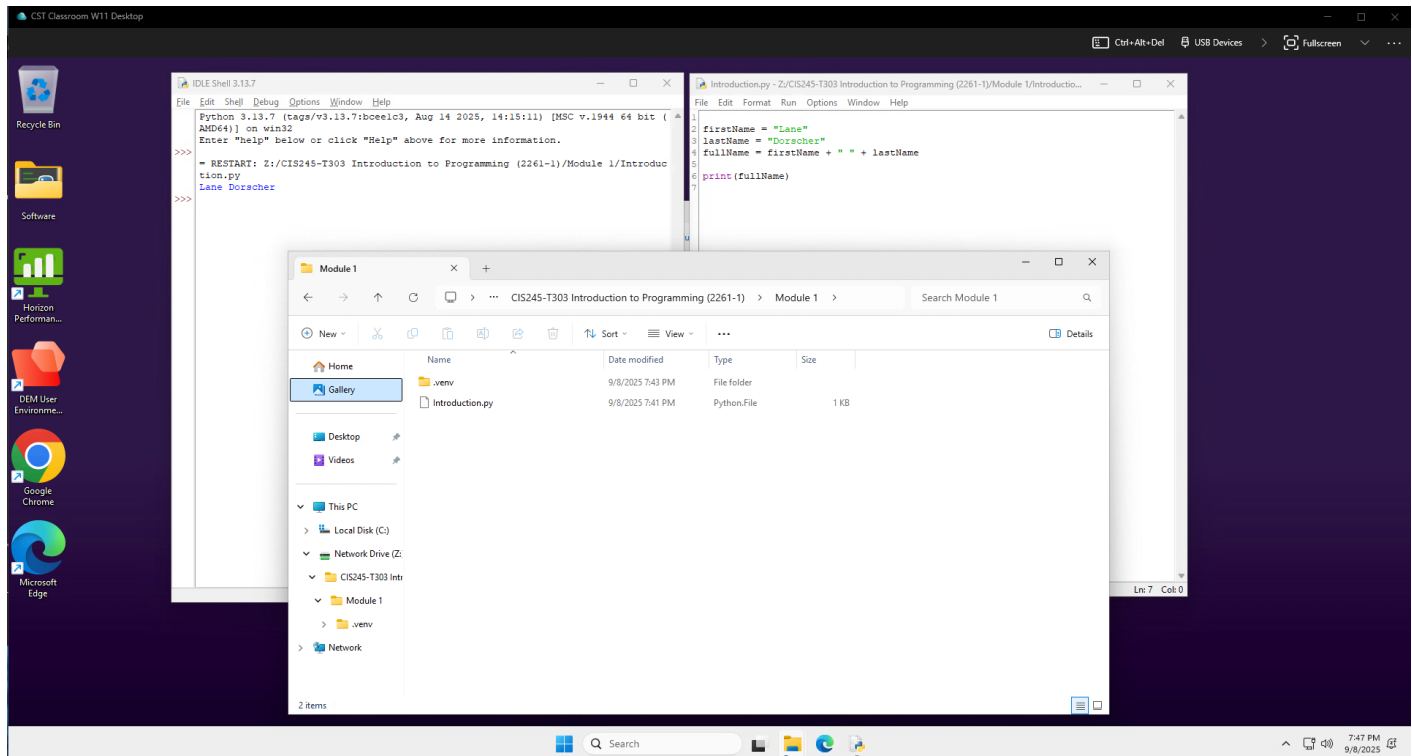

The screenshot shows the IDLE Shell window. The title bar reads 'IDLE Shell 3.13.7'. The menu bar includes 'File', 'Edit', 'Shell', 'Debug', 'Options', 'Window', and 'Help'. The shell displays the following text:

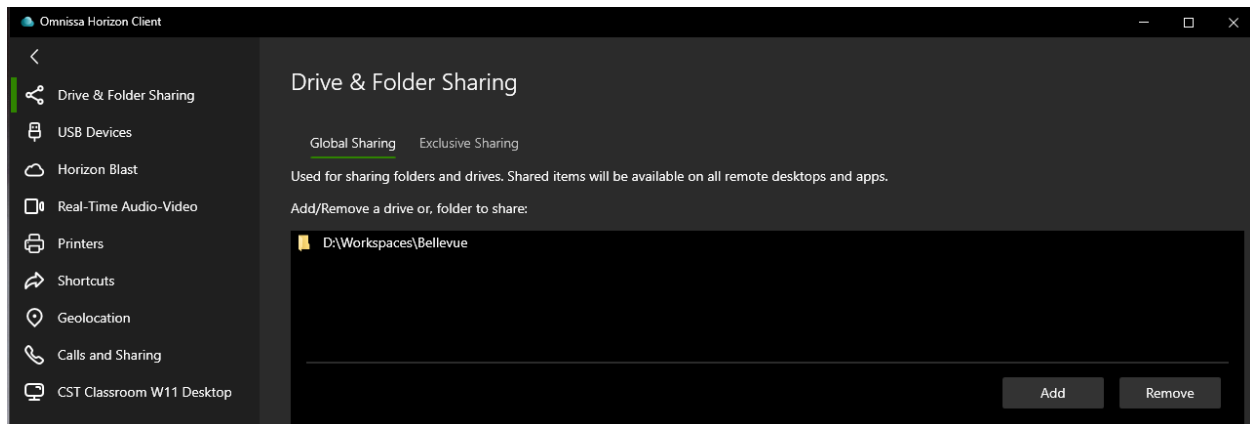

```
Python 3.13.7 (tags/v3.13.7:bceelc3, Aug 14 2025, 14:15:11) [MSC v.1944 64 bit (AMD64)] on win32
Enter "help" below or click "Help" above for more information.

>>>
= RESTART: Z:/CIS245-T303 Introduction to Programming (2261-1)/Module 1/Introduction.py
Lane Dorscher
>>> |
```

This screenshot doesn't do a lot of justice other than showing the file explorer and IDLE shell and IDE open together on my virtual desktop

However, here is proof that my workspace is setup for network sharing with the virtual desktop.

My newly created workspace with the saved program from the virtual desktop.
